

Implementation of Cooperation Projects in Transport Enterprises in Accordance with the Investment Programs of the Republic of Uzbekistan

Xasanova Zamira Madiyorovna

Tashkent State Transport University Master

Abstract: In order to radically improve the system of public administration in the field of transport, increase the investment attractiveness and export potential of the Republic, ensure the strategic development and sustainable operation of transport communications, major international investment projects are being implemented and enterprises are constantly developing.

Key words: Transport, enterprise, communication, cooperation, investment, international, strategy, project, potential, capital, railway, management.

In order to radically improve the system of public administration in the field of transport, increase the investment attractiveness and export potential of the Republic, ensure the strategic development and sustainable operation of transport communications, as well as the five priority areas of development of the Republic of Uzbekistan in 2017-2021 The Ministry of Transport of the Republic of Uzbekistan was established on the basis of the Transport Agency. All transport sectors have their own place in our economy. Rail transport also plays a very important role in the development of the state economy, as it ensures the normal operation and development of all its branches, regions and enterprises through the transportation of goods in accordance with the needs of freight transportation. In order to radically improve the system of public administration in the field of transport, increase the investment attractiveness and export potential of the Republic, ensure the strategic development and sustainable operation of transport communications, as well as the five priority areas of development of the Republic of Uzbekistan in 2017-2021 The Ministry of Transport of the Republic of Uzbekistan was established on the basis of the Uzbek Agency for Road Transport in accordance with the tasks set out in. All transport sectors have their own place in our economy. Rail transport also plays a very important role in the development of the state economy, as it ensures the normal operation and development of all its branches, regions and enterprises through the transportation of goods in accordance with the needs of freight transportation. Rail transport is an important sector of the economy, ensuring the economic security and integrity of the state.

In accordance with the Investment Program of the Republic of Uzbekistan for 2010-2020, JSC "Uzbekistan Railways" has disbursed more than 6161.03 million US dollars. In 2010-2020, Uzbekistan Railways will receive several loans from the Japan International Cooperation Agency, the Asian Development Bank, the OPEC Fund, the European Bank for Reconstruction and Development, the German KfW Bank, the KfW Kuwait Fund, the People's Republic of China and the World Bank. investment projects have been implemented. During this period, the following major investment projects were implemented and commissioned, including:

“Construction of a new railway line Tashguzor-Baysun-Kumkurgan” - the implementation of this project has created an opportunity to connect not only Surkhandarya and Kashkadarya regions, but also the southern regions of the Republic with the capital and other regions. This, in turn, laid the foundation for the development of mining, agriculture and other sectors in Uzbekistan.

In the railway sector, the European Bank for Reconstruction and Development, the People's Republic of China loans have been used to upgrade the locomotive fleet, the German KfV Bank and the KFAER Kuwait Fund have implemented the Tukimachi (Tashkent) -Angren-Pop railway electrification project.

These projects have also created opportunities to increase passenger and freight efficiency, freight volume, train safety and freight turnover, improve the environmental environment in the Republic.

22 section electric passenger locomotives, 15 freight electric locomotives, 4 diesel locomotives, 4 high-speed passenger electric trains Talgo-250 were purchased, more than 475 locomotive sections, more than 19,400 freight cars were restored and modernized, more than 5,769 loads wagons and more than 199 passenger wagons were built, and more than 2,180 railroads were rehabilitated.

At the same time, a healthy competitive environment is being formed in the economy, and there is a need for continuous development of enterprises. The concept of enterprise profitability is an indicator of how an enterprise develops from year to year, and the need to identify it and increase it as much as possible. Through the analysis of the economic performance of the transport enterprise and useful proposals are being developed to increase the profitability of the given enterprise.

They include:

- Explain the role of "Tashkent freight car depot" in the ranks of railway transport enterprises of the Republic of Uzbekistan;
- Detailed acquaintance with economic indicators of "Tashkent freight car depot";
- Detailed analysis and analysis of economic indicators of "Tashkent freight car depot";
- Demonstrate ways to improve the economic efficiency of the enterprise on the basis of the analysis;
